

## Incontinence briefs – in lingerie look

for light to moderate incontinence

### Safe protection - lingerie look

Everyday life is often difficult for people suffering from incontinence. These people prefer to stay at home and often lose their social contacts.

They do not like wearing disposable pants during sport. Even more, disposable pants are difficult to change on the go.

suprima briefs look like normal underwear. With absorbent pads, they offer perfect protection for every degree of incontinence - from light to heavy.
